

## **SITE** Point Pelee National Park

Leamington, Ontario, Canada

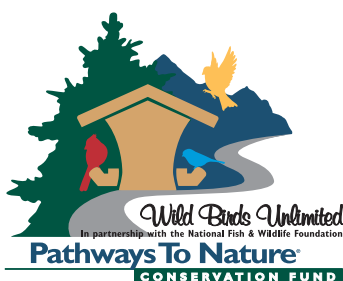

### **PROJECT** Discovery of Point Pelee exhibit

The focal point of this exhibit is a 10-square-meter diorama of a Carolinian forest. The diorama represents Point Pelee's original natural forest habitat and includes trees, herbaceous groundcover, and native flowers and wildlife. Visitors can learn about the area's unique natural environment and the importance of its restoration and preservation.

**GRANT** \$25,000 (U.S.) plus \$25,000 in local matching funds.

**NOTEWORTHY** This area is a major migratory stopover point in North America and is internationally recognized for its resident and migrant bird life, including Hooded, Kentucky, Worm-eating and Northern Parula warblers.
