

SITE The Nature Conservancy's Ramsey Canyon Preserve Hereford, Arizona

PROJECT Pollinator Education Initiative

The Pollinator Education Initiative includes a garden planted with native plants to attract butterflies and up to 14 different species of hummingbirds. Hummingbirds and butterflies represent the rich biodiversity of animal pollinators found in Arizona. Some others include bees, wasps, beetles, flies, moths and bats.

To learn more about Ramsey Canyon Preserve, access www.tncarizona.org/preserves/ramsey.asp.

GRANT \$31,000 plus \$31,000 in local matching funds.

NOTEWORTHY This area boasts the highest number of hummingbird species of anywhere in the United States.
