Ripley and Union City, TN

PROJECT Window To Birds viewing platforms

GRANT \$19,000 plus \$19,000 in local matching funds.

NOTEWORTHY More than 250 bird species, many of them waterfowl, use this area as a stopover site during migration.

This grant funds the construction of viewing platforms and interpretive signs at Chickasaw and Lake Isom wildlife refuges. Both areas are part of the Western Tennessee National Wildlife Refuge in the western part of the state and lie in the heart of the Mississippi flyway. The new wildlife viewing areas increase the opportunities for bird observation, environmental education and nature interpretation.

To learn more about the Chickasaw and Lake Isom wildlife refuges, access <http://westtnrefuges.fws.gov>.
